

Ripstation 7000 Series

Professional Grade Data Ripping Systems

Fast, Reliable, Affordable

The Ripstation from MF Digital is the most advanced commercial Disc Ripper available. Ideal for large corporations, content aggregators or service bureaus looking to expand their range of services, the Ripstation 7600 Series is a perfect solution.

Engineered to perfection the Ripstation is designed for long run disc ripping with absolutely no human intervention. Completely automated, the Ripstation will extract data from CD or DVD, automatically, disc after disc. The Ripstation data ripper extracts to either the original file structure of the disc or creates a single global disc image. The "KVM" PC built-in solution means each Ripstation System is pre-configured which results in easy setup without error - simply connect Keyboard, Video Monitor and Mouse and begin ripping.

MF Digital offers unique features which other manufacturers do not. From the moment you open the box to the last disc of the day, you can count on Ripstation.

Disc Ripping Abilities	
Batch Mode	Data Rip Sets of Discs
File Structure	Rip to Original File Structure
Backup	Ideal for CD DVD Archive or Backup

Ripstation 7000 Series

Data Grabber

MF Digital's Data Ripstation offers more versatility and flexibility than any other ripping system. Data archiving and backup is quick and easy with the Ripstation automated data ripper. Ripstation offers extremely accurate and consistent data ripping for every disc.

Flexible Configurations

Ripstation data ripper offers software configurations for archive to a single global disc image or archive disc content to original file and folder structure. Software features include specific network storage locations to digitally archive your batch of CDs or DVDs to the exact location needed.

Ripping Accuracy

MF Digital's Data Grabber is a very reliable disc archiving tool, with full error correction verification support from the source disc to the digital copy. Ripstation includes drive stop control and automatic software updates to insure your Ripstation has the latest features and benefits.

Multi-Threading File Mover

Maximum efficiency of Disc Ripping can be obtained from our multi-threading technology. Multi-threading means each drive in the Ripstation works independently. This enhancement increases overall throughput performance and reduces the amount of time needed to rip a set of CDs.
