

5600 VideoLIVE

Live Video Event Recorder/Copier

State-of-the-art Live Video Capture & Duplication

Simple, Flexible, Scalable, Affordable

The 5600 Series Live Video event recorder and duplicator advances the method of capturing and duplicating video. Highly streamlined work flow allows you to go quickly and easily from capturing video to the production of DVDs in quantity, all within minutes of the end of an event.

Ideal for any venue, the live video event recorder is a "must have" for producing high quality DVD copies. Designed in a space saving rack-mount enclosure the 5600 VideoLIVE Series is not only compact, but expandable. Easily connect multiple units to increase production from 6 to 60 drives, yet control everything from a single console.

Whether it's a Church event, seminar, court deposition or live concert the Live Series from MF Digital has the exact features you need.

Truly in a class by themselves, let our Live Event Duplicators do more for you; experience the future with MF Digital.

Key Features

- Capture live video & duplicate fully authored DVDs
- Fully authored with menus and chapters
- Expandable from 6 to 60 drives

5600 VideoLIVE

Live Video Event Recorder/Copier

Capture the Moment

Not all live event recorders are created equal. MF Digital solutions are unique because they not only offer you the ability to record live, but instantly duplicate that event.

Ease of use is a primary concern and with simple wizard software and one-click duplicating even the most novice user will be an expert.

Designed for Live Events

This sleek rack-mount unit is an end-to-end automated DVD authoring solution that offers real-time video/audio capture, recording and multi-drive duplication of DVDs during live events.

Professional DVD menus, various chaptering options, first play audio/video allow for professional looking DVDs just-in-time.

Scaleable & Network Ready

The 5600 VideoLIVE is completely scalable and can produce an almost unlimited number of fully authored DVDs in less than 10 minutes from the conclusion of the event.

Incrementally, 6-bay modules may be added to provide for a massive copy capability. Gigabit Ethernet allows you to retrieve additional content from anywhere on your network quickly.

Professional Quality and Output

Choose from professional templates to create professional looking DVDs almost immediately after your event ends.

MF Digital has been making high quality products for over 30 years. Our experience goes into each one.
